1400-24hr - 24 Hour Flashing Beacon

Available in amber or red. Used to alert motorists of significant warnings, such as remote stop signs or high risk areas.

2400 - Dual Signal Head

Mounts on standard 4" - 4.5" lamp posts. A typical crosswalk has one bracket assembly mounted at each side of the road.

Multiple Sizes and Colors

All Active Beacons are available with 8" or 12" diameter signal heads. There are two stock colors, green and yellow. Custom colors are available as a special order.

1400 - Single Signal Head

Mounts on standard 2 3/8" sign posts. It can be used as an additional preemptive warning beacon ahead of the crosswalk or for one way applications.

3400 - Overhead Mount Assembly

Mounts on the mast arm above the crosswalk, typically with banding. It easily mounts on existing pole structures.

5400 - Overhead Sign Frame Assembly

Mounts on the mast arm above a crosswalk, typically with spring cushion hangers. Frame is for 3' x 4' signs. Other frame sizes are available. Signs and hanging hardware are not included.

Side-Arm Bracket

The side-arm bracket is used to mount the back-to-back assembly or the individual mount assembly to the side of a pole.

Remote Transmitter

The remote transmitter is used for applications where the push-button needs to be remote from the pole where the beacon assembly is mounted. Mounts on a standard 2 3/8" sign post.
